

## IBM & One Point Solutions Invite You to a Data Management Briefing and Luncheon

Smarter Data Management:

Looking for a way out of the data management jungle?

IT managers have more challenges today than ever: escalating data volume, integration and analysis of data from disparate sources, complex privacy and retention requirements, and stringent data quality needs -- all this while driving to ROI goals and established service level agreements.

The operational issues -- and the need for continued cost containment -- might make you feel like you'll never have time to focus on the strategic IT issues that really matter. But there is a way to make managing your data hassle free!

Join IBM and One Point Solutions as we discuss the important details of how IT organizations like yours can cost effectively manage exploding volumes of data that must be captured and transformed into actionable information, improve service levels across the enterprise, and manage analytic results and business insights from the data and additional users.

**Join IBM Information Management & One Point Solutions for a Complimentary Data Management Briefing and Luncheon:**

**Date:** Tuesday, June 8, 2010

**Time:** 11:30 a.m. - 1:00 p.m.

**Location:** **The Capital Grille**  
2800 West Big Beaver Road  
The Somerset Collection North  
Troy, MI 48084

This event will benefit organizations that want to understand how to reduce operational costs, increase efficiency and productivity, and leverage Information Management best practices.
