

On Point with One Point

Volume 1 - August 2008

This is the initial publication of One Point Solution's eNewsletter titled "On Point with One Point". Our intent is to use this as a vehicle of communication related to issues, events and offerings from One Point Solutions and IBM on products and services that would be of interest to our clients. We hope that you see value in the information we are consolidating and presenting to you.

DB2 for Linux, UNIX and Windows:

With innovative capabilities as a hybrid data server and the cost savings offered by deep compression, DB2@ 9.5 is designed to:

- Enable rapid use of data
- Help you stay ahead of threats
- Extract the full value of XML data

[Click here](#) to learn more about this release.

[Watch](#) a short video with Vice President of Product Development Sal Vella about DB2 9.5 highlights and future strategy.

A couple of items for our Informix Customers:

Informix 11.5 - New Features & Availability:

[Click here](#) to view updated features for this scalable engine.

Informix eBook: Exploring IDS 11

Informix guru Lester Knutsen explains how to get IDS 11 up to full speed using the Sysmaster database to monitor server status and performance. This downloadable e-book includes an overview of IDS 11 features, plus an in-depth look at what new and improved Sysmaster tables can tell you

IBM and Data Warehousing:

Many of you already know that the IBM DB2 Data Warehouse Editions have been renamed to IBM InfoSphere DB2 Warehouse. These new solutions include ETL capabilities and limited Cognos capabilities as well. Perfect for a company that wants to get launched quickly. Read more about how this technology is used in an article by Ron Flannery
