# One Point of Contact for Data and Reporting Solutions

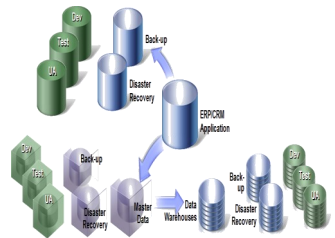

Because every company's data is different, there is no simple solution that can apply to every situation. One Point focuses entirely on IBM data solutions, allowing its customers to grow and enhance its business using its data. Value to your company:

- **One Point of Contact.** *One Point can help you select, purchase, install and support any of the solutions below.*
- **Cloud or Local Deployment.** *Implement using IBM Bluemix, your cloud, or your servers.*
- **Start Anywhere, Grow as Needed.** *For any size company and any business need, solutions can be enhanced when needed.*

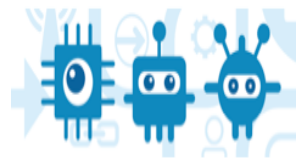

## Core Database Integration and Expansion. *Everything starts with the data.*

- Integrate, enhance and improve just about any ERP, MRP, operational, and other database systems.
- Create and manage specialized databases for BigData, IoT, and sensors.
- Install and service any standard IBM database and data warehouse solution.

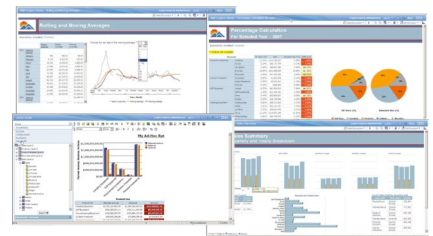

## Connected Sensors and The Internet of Things. *The new world of data.*

- Provide sensors, gateways, and specialized data processing.
- Integrate and analyze data historically or real-time.

## Historical and Predictive Analytics and Dashboards. *Replace spreadsheets, simplify processes, optimize business insight.*

- Standard reporting
- Finance, budgeting, forecasting
- Operations, Supply Chain
- Group collaboration, what-If scenarios
